

# Are Our Children Learning?

## 2024 Bugiri District Report Card

In August 2024, Uwezo Uganda's citizen surveyors assessed 802 children ages 4+ from 300 households in Bugiri on basic English literacy and numeracy skills.

Uwezo also visited 15 schools in the district.

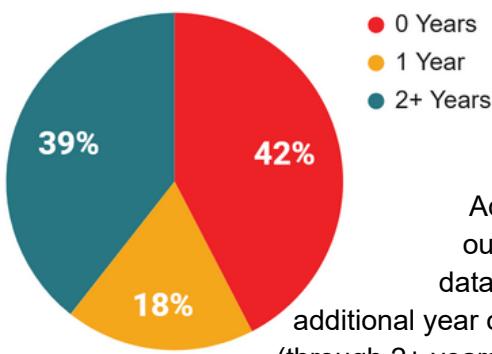

### 1. How well can children read and count, by grade, in Bugiri?

In Bugiri, a majority of children in Primary 3 were not able to do Primary 2 work. Even by the end of the primary cycle, a significant minority of children were unable to do Primary 2 reading. Differences by gender were very minor.

Primary 2 proficiency is the ability to read with comprehension and do all four arithmetic functions (+ - x ÷).

### 2. How many primary school children in Bugiri have attended pre-primary?

Across Uganda, our assessment data show that an additional year of pre-primary (through 2+ years) increases a learner's likelihood of achieving math and reading proficiency. In Bugiri, while most children have attended one or more years of pre-primary school, a significant minority have never attended.

### 3. How many primary school children in Bugiri appear to continue to the next grade?

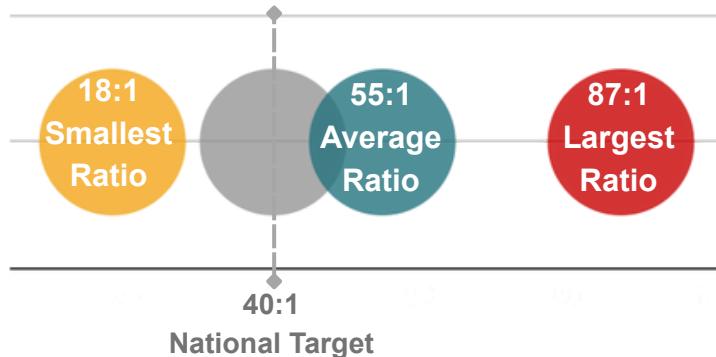

Continuing primary school study is crucial for a child's learning. Though Uganda has an automatic promotion policy, some children did not appear to continue to the next grade.

**14%**

of learners did not continue to the next grade

#### 4. How many learners per teacher?

Low pupil:teacher ratios are key for children's learning. The average pupil:teacher ratio in schools visited in Bugiri was 55:1, higher than the national target, and the largest was 87:1

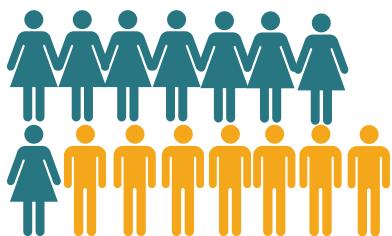

#### 5. Are teachers present at school?

Present teachers are a crucial ingredient for learner success. When teachers are absent, children receive less instructional time, negatively affecting their learning.

**18%** of teachers were absent on the day of the survey, on average

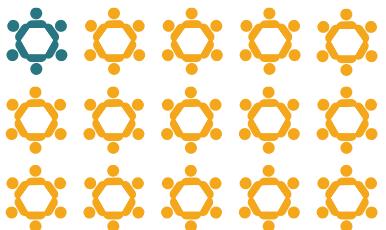

#### 6. Are women involved in school governance?

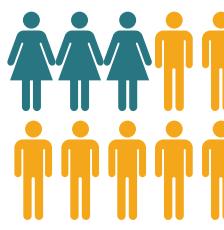

**8**  
out of 15  
school leaders  
were female

In Bugiri, school leadership was gender balanced, with 8 out of 15 school leaders (head teacher, deputy head teacher, or teacher left in charge on the day of the survey) being female. A gender imbalance was present in School Management Committee (SMC) leadership and membership.

**1**  
out of 15 SMCs surveyed  
in Bugiri had female  
chairpersons

**3**  
out of 10 SMC  
members were female,  
on average

This report card was produced by Uwezo Uganda in October 2025.
