

Are Our Children Learning?

2024 Isingiro District Report Card

In August 2024, Uwezo Uganda's citizen surveyors assessed 713 children ages 4+ from 295 households in Isingiro on basic English literacy and numeracy skills. Uwezo also visited 15 schools in the district.

1. How well can children read and count, by grade, in Isingiro?

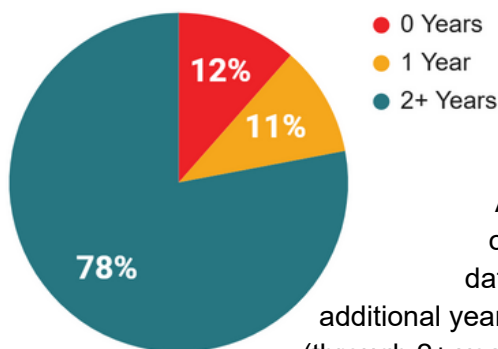

Percentage of Children Reaching Primary 2 Proficiency, by Grade

In Isingiro, a majority of children in Primary 3 were not able to do Primary 2 work. By the end of the primary cycle, most children were able to do Primary 2 work. Differences by gender were very minor.

Primary 2 proficiency is the ability to read with comprehension and do all four arithmetic functions (+ - x ÷).

2. How many primary school children in Isingiro have attended pre-primary?

Across Uganda, our assessment data show that an additional year of pre-primary (through 2+ years) increases a learner's likelihood of achieving math and reading proficiency. In Isingiro, most children have attended two or more years of pre-primary school.

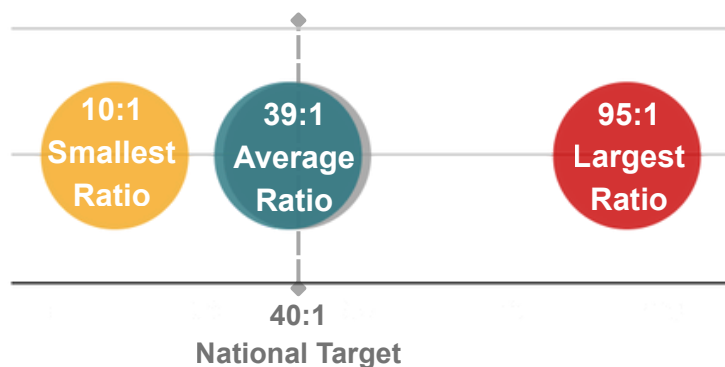

3. How many primary school children in Isingiro appear to continue to the next grade?

Continuing primary school study is crucial for a child's learning. Though Uganda has an automatic promotion policy, some children did not appear to continue to the next grade.

18% of learners did not continue to the next grade

4. How many learners per teacher?

Low pupil:teacher ratios are key for children's learning. The average pupil:teacher ratio in schools visited in Isingiro was 39:1, just lower than the national target, though the largest was 95:1

5. Are teachers present at school?

Present teachers are a crucial ingredient for learner success. When teachers are absent, children receive less instructional time, negatively affecting their learning.

12% of teachers were absent on the day of the survey, on average

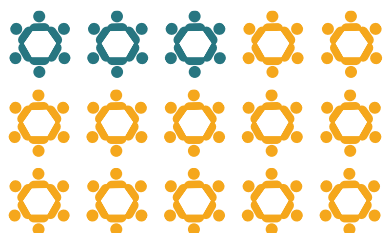

6. Are women involved in school governance?

3

out of 15 school leaders were female

In Isingiro, the gender imbalance in school leadership was clear, with just 3 out of 15 school leaders (head teacher, deputy head teacher, or teacher left in charge on the day of the survey) being female. The gender imbalance was similar in School Management Committees (SMCs).

3

out of 15 SMCs surveyed in Isingiro had female chairpersons

3

out of 10 SMC members were female, on average

This report card was produced by Uwezo Uganda in October 2025.
