

# Are Our Children Learning?

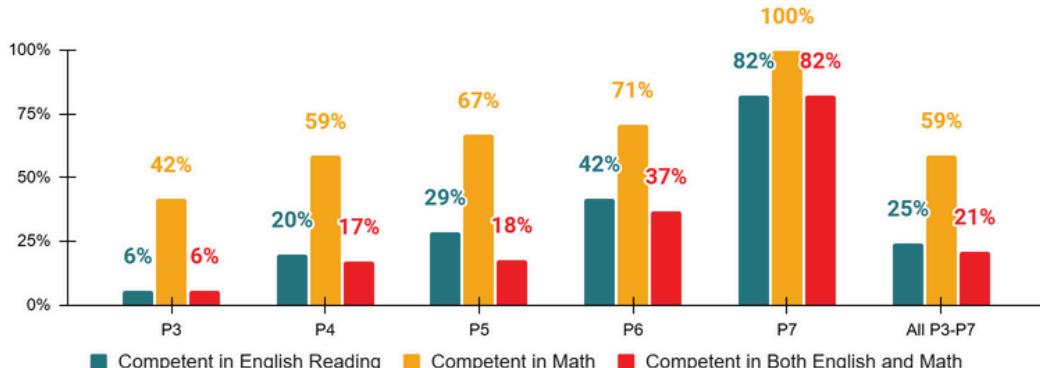

## 2024 Kapchorwa District Report Card

In August 2024, Uwezo Uganda's citizen surveyors assessed 668 children ages 4+ from 300 households in Kapchorwa on basic English literacy and numeracy skills.

Uwezo also visited 15 schools in the district.

### 1. How well can children read and count, by grade, in Kapchorwa?

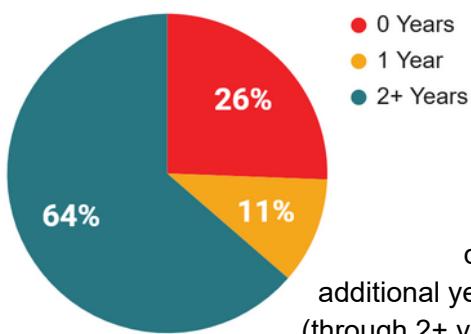

Percent of Children Reaching Primary 2 Proficiency, by Grade

In Kapchorwa, a majority of children in Primary 3 were not able to do Primary 2 work. Even by the end of the primary cycle, a small minority of children were unable to do Primary 2 reading. Differences by gender were very minor.

Primary 2 proficiency is the ability to read with comprehension and do all four arithmetic functions (+ - x ÷).

### 2. How many primary school children in Kapchorwa have attended pre-primary?

Across Uganda, our assessment data show that an additional year of pre-primary (through 2+ years) increases a learner's likelihood of achieving math and reading proficiency. In Kapchorwa, while most children have attended two or more years of pre-primary school, one quarter of children have never attended pre-primary.

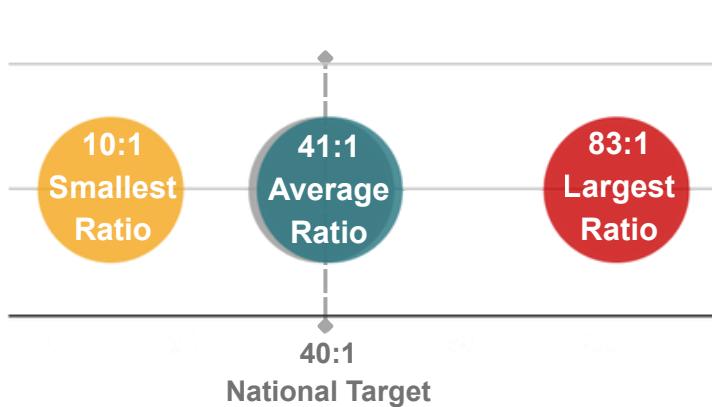

### 3. How many primary school children in Kapchorwa appear to continue to the next grade?

Continuing primary school study is crucial for a child's learning. Aligned with Uganda's automatic promotion policy, only 5% of children did not appear to continue to the next grade.

**5%** of learners did not continue to the next grade

#### 4. How many learners per teacher?

Low pupil:teacher ratios are key for children's learning. The average pupil:teacher ratio in schools visited in Kapchorwa was 41:1, just higher than the national target, though the largest was 83:1

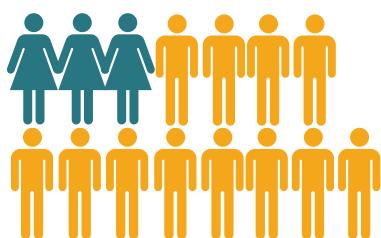

#### 5. Are teachers present at school?

Present teachers are a crucial ingredient for learner success. When teachers are absent, children receive less instructional time, negatively affecting their learning.

**21%** of teachers were absent on the day of the survey, on average

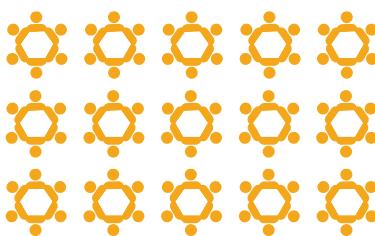

#### 6. Are women involved in school governance?

**3**  
out of 15  
school leaders  
were female

In Kapchorwa, there was a gender imbalance in school leadership, with 3 out of 15 school leaders (head teacher, deputy head teacher, or teacher left in charge on the day of the survey) being female. There was also a gender imbalance in School Management Committees (SMCs), where none of the SMCs in surveyed schools had a female chairperson.

**0**  
out of 15 SMCs surveyed  
in Kapchorwa had  
female chairpersons

**2**  
out of 10 SMC members  
were female, on average

This report card was produced by Uwezo Uganda in October 2025.
